

MOISTURE GUARD SPRAY GREEN

Indoor corrosion preventative

Moisture Guard Spray Green is a thin, almost dry corrosion preventative film suitable for the temporary indoor protection of components such as bearings, gears, pressings and any machined metal product which requires protection from corrosive attack - whether in storage, transit or between operations.

Moisture Guard Spray Green is ideal as a visible, medium/long term indoor corrosion protection of bare metal components and mould tools particularly where condensation is a problem.

Features

- Effective indoor corrosion protection.
- Tenacious soft film - easily handled.
- Almost dry film - does not attract dirt and dust.
- Particularly effective in damp or humid environments.

Directions for Use

Shake well, hold upright and spray from a distance of approx. 15-30cm (6-12inches).

One pass usually provides sufficient protection. Ensure adequate ventilation. Do not spray onto naked flame or any incandescent material.

It is recommended that that compatibility with painted and coated surfaces, plastics and rubbers be tested prior to use.
